

Cameron Ela

M.S. Artificial Intelligence Candidate, Johns Hopkins University

About

Cameron Ela (EE-LUH) is a Data Engineering Intern at CureMetrix. He earned his B.S. in Economics and Data Science with a Minor in Artificial Intelligence from the University of Southern California in 2024. Continuing at USC, he completed his M.S. in Applied Data Science a year later. He is based in Long Beach, California.

Cameron hopes to use his data science background to advance healthcare, helping develop more effective treatments for autoimmune diseases. Specifically, his goal is to one day help cure or permanently suppress ulcerative colitis, a form of the autoimmune condition inflammatory bowel disease.

Quick Hits

- Loves water sports — played water polo, rowed, and swam growing up
- Enjoys weight training
- Played alto and tenor saxophone for 10 years; produces mixes with DJing
- Spends hours gaming, especially *Civilization VI*, *Overwatch*, and *Minecraft*
- Watches lots of association football (soccer) and college football. Die-hard Real Madrid and USC Trojans fan!
- Learning Vietnamese on Duolingo to better communicate with older family

Projects

Personal Website Project (you are here!)

This is a personal website built using Flask. The basic core pages (Home, Contact, and Projects) belong to a single Blueprint, leaving room for additional Blueprints in the future if the site is expanded. The styling and theme of this site is inspired by the [USC website](#).
